Project Name	Metro Ticket Booking System using ServiceNow
Maximum Marks	4 Marks

Empathy Map Canvas:

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes. It is a useful tool to help teams better understand their users. Creating an effective solution requires understanding the true problem and the person who is experiencing it. The exercise of creating the map helps participants consider things from the user's perspective along with his or her goals and challenges.

Empathy Map: Metro Ticket Booking Application

User persona: A daily metro commuter (student or working professional) who travels at peak hours and uses a smartphone for most everyday tasks.

<table>
<tr><td colspan="3">THINK & FEEL
"I don't want to miss my train."
"Will the queue be too long today?"
"I hope I have the right change."
Worried, rushed, impatient; wants a simple and reliable way to travel</td></tr>
<tr><td>HEAR
Friends say digital tickets save a lot of time
Announcements about crowded platforms
Colleagues complain about long queues at peak hours
Staff saying "no change available"</td><td>THE METRO COMMUTER (daily traveller, smartphone user)</td><td>SEE
Long queues at ticket counters and kiosks
Fare charts that are hard to read
Other passengers already using QR or card entry
Crowded stations in the morning and evening</td></tr>
<tr><td colspan="3">SAY & DO
Reaches the station early just to buy a ticket
Asks staff or other passengers about the fare
Carries cash and counts coins in the queue
Says "I wish I could book this from my phone"</td></tr>
<tr><td colspan="2">PAIN
Long waiting time and missed trains
Cash and change problems
Not knowing the exact fare in advance
Paper tickets get lost or damaged</td><td>GAIN
Book in a few taps from phone or laptop
Fare shown automatically and correctly
Instant QR ticket and email confirmation
Saves time, stress-free journey</td></tr>
</table>

Example reference: Food Ordering & Delivery Application

The template example captures what a user thinks, hears, sees, says and does, and then summarises pain and gain. The same structure has been applied above for the metro commuter.
